## **Model 4132SS MANUAL GROSS BAGGER**

*Model 4132SS Bagger shown  
without Optional Accessories.  
(Accessories sold separately)*

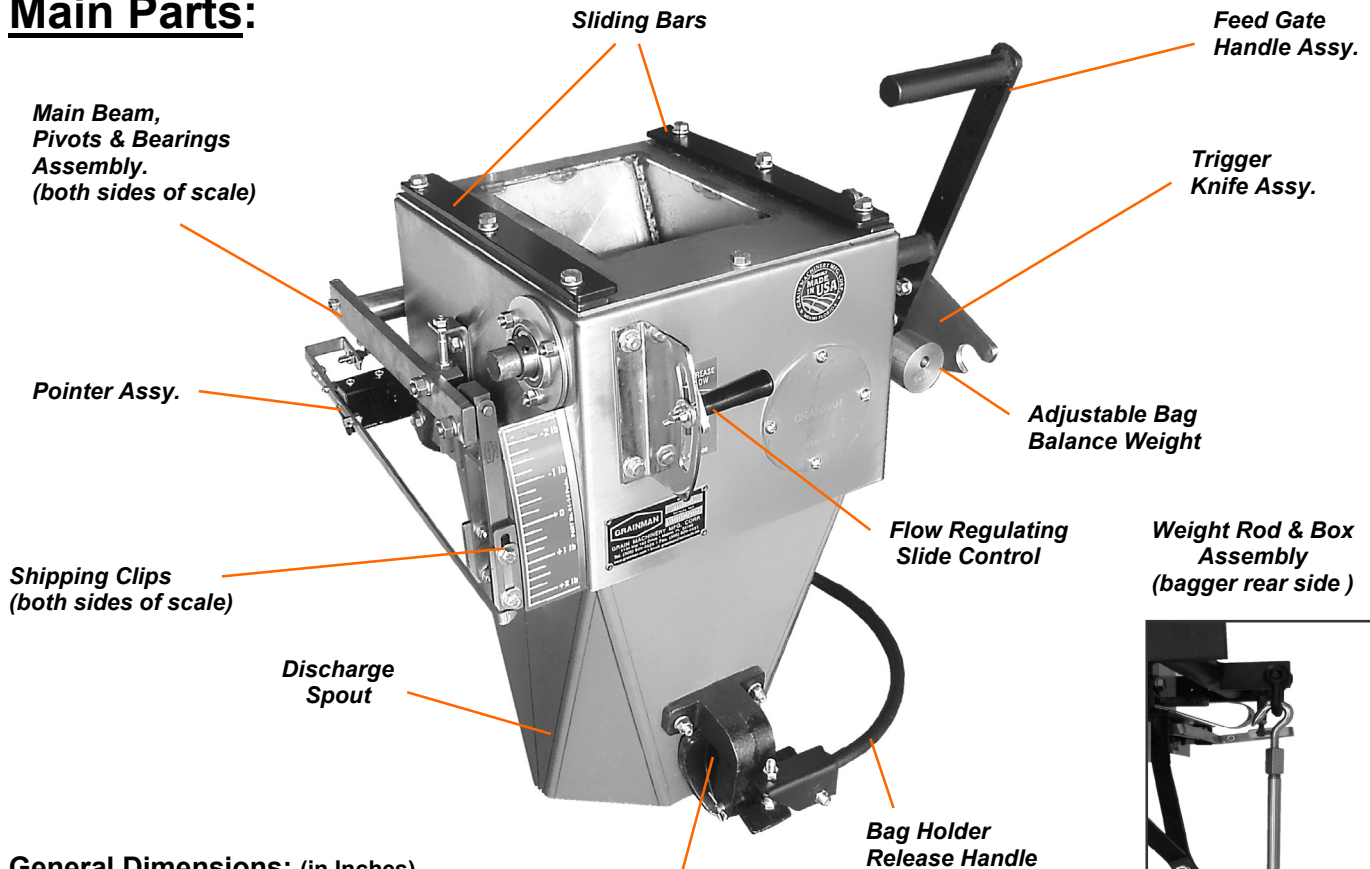

The Grainman 4132SS Series is a manual operated open mouth gross weighing bagger. It is the ideal bagger when you are in a budget or electricity is not available to bag your product. It is easy to operate with low maintenance during the whole year

### **STANDARD FEATURES:**

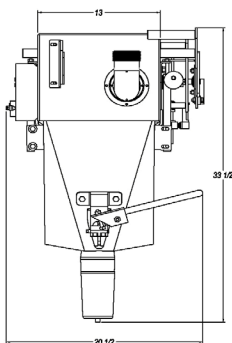

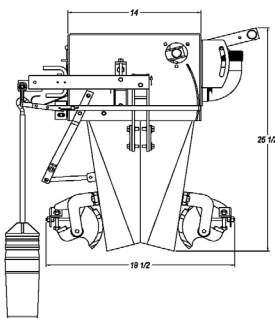

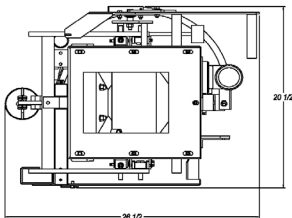

- up to 4-6 bags per minute capacity (depending on installation, setup, operation, operator)
- 5 to 1 calibrated beam.
- Full set of weights.
- Adjustable Flow Control.
- Low Operation Cost – Fully Mechanical, no need of electricity or expensive pneumatic systems.
- Ideal for rice, corn, soybeans, pellets, fertilizers, and most grains
- Dust Pickup Port, on front of the bagger, to connect to your existing vacuum system
- Stainless Steel - type 304- fabrication, in most parts like main body, spout and parts in contact with product (some parts made in aluminum and cast iron).
